

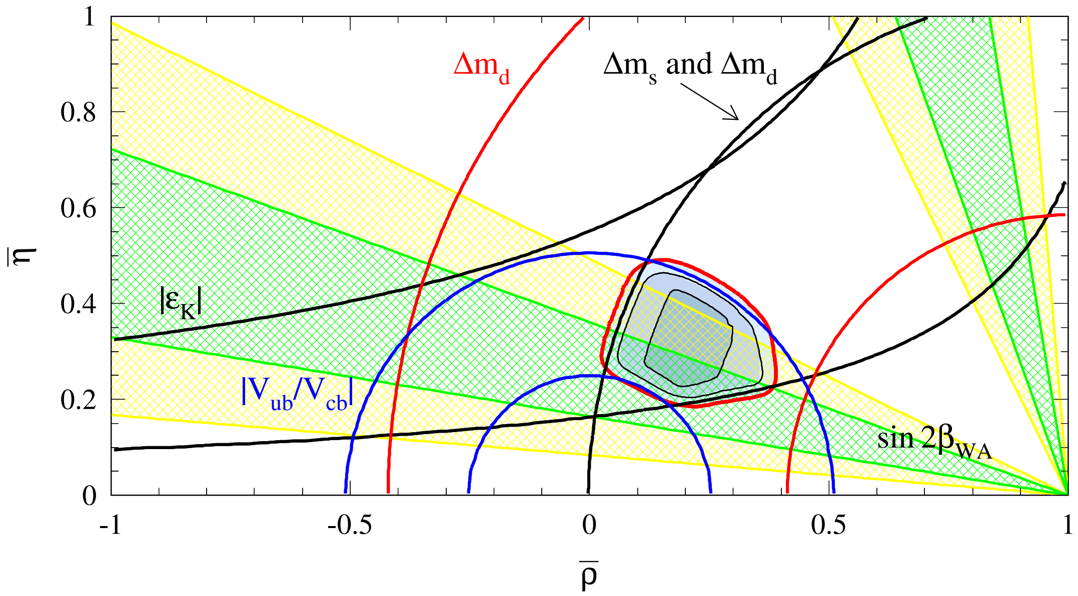

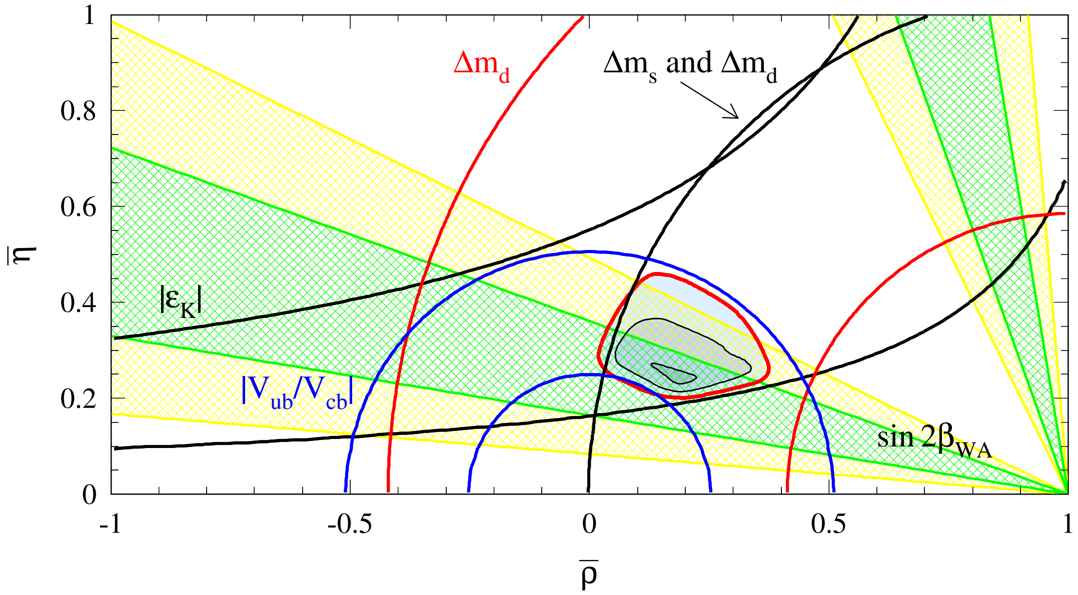

Figure 2: *Upper plot: confidence levels in the $(\bar{\rho},\ \bar{\eta})$ plane for the global CKM fit. The shaded areas indicate the regions of $\geq 90\%$, $\geq 32\%$ and $\geq 5\%$ CLs, respectively. Also shown are the 5% CL contours of the individual constraints. The $\geq 32\%$ and $\geq 5\%$ CL constraints from the world average of the $\sin 2\beta$ measurements, not entering the combined fit, are depicted by the dashed areas. See "The Paper" for a compendium of the fit input values. Lower plot: confidence levels obtained when including the world average of $\sin 2\beta$ in the combined fit.*
